

# Obitope Eniola Nathaniel

FULL STACK SOFTWARE ENGINEER (<https://oendevworks.vercel.app/>)

Over three years experienced full-stack software engineer who develops web applications, nice user experience and solid backend systems. My skill extends to creating well-structured code which remains easy to maintain and solves difficult problems with great efficiency.

+234 905 969 2851

Lagos, Nigeria.

## PROFESSIONAL EXPERIENCE

### Back-End Software Engineer (11/2024 – 4/2025) Sheiz Financial Technology Services Limited

- Developed and preserved RESTful APIs that operated on Django, Fast API, Node.js and Express for fundamental financial service operations.
- I employed MongoDB database management systems and PostgreSQL/MySQL or MySQL for secure database schema structure and optimization.
- Authenticity systems together with authorization protocols were applied to safeguard user information along with regulatory financial requirements for compliance.
- Worked together with the team to merge backend solutions with user interface components and protected data transmission between them.

### Front-End Software Engineer (01/2024 – 09/2024)

#### The Builder and Maker International

- I joined forces with the tech team to create and preserve user-friendly web pages for the church through the combination of HTML, CSS, JavaScript and React.
- The team worked together to create responsive designs and interactive user interface components by using React in order to boost user engagement.
- Helped resolve bugs in the church website while working on improvements that increased user operation efficiency.
- I took part in weekly sprint meetings together with performing code reviews that provided practical experience in Agile development practices.

## EDUCATION
